

## XCMG Wheel Loader

### XCMG STORY

#### XCMG RECONDITIONED MACHINE

XCMG reconditioned machine is the second-hand machine program launched by XCMG for the post market. XCMG takes advantage of its dealers network to collect the second-hand XCMG machine that falls into strict standards: good condition, full function and low service hours. The returned machine is then disassembled, repaired, painted, rebuilt and tested officially by XCMG, and the product life is therefore extended. The price of XCMG reconditioned machine is far lower than that of the new one, but its performance and safety are not compromised thanks to XCMG's state-of-the-art processes and technologies. In order to dispel customers' concerns, XCMG establishes a strict evaluation system for reconditioned machines and invites SGS to issue third-party certification.

### OUR TEAM

#### 150+ SPECIALISTS

150+ specialists participate in the reconditioning process.

**Inspection Team**  
Certified professional inspectors who have worked for more than 10 years conduct comprehensive analysis on the machine.

**Reconditioning and Repairing Team**  
Refinish core parts to restore usability. Replace all worn parts with genuine XCMG core parts.

**Issuing Report Team**  
Certified customer reports, tests and verifies the reconditioned machine. SGS issues the third-party inspection certificate.

### OUR FACTORY

#### REMANUFACTURING FACTORY

### RECONDITION PROCESSES

#### RECONDITION PROCESSES OF THE USED

We maintain a meticulous and rigorous attitude toward quality, focusing on extraordinary creativity, elaborate designs and exquisite craftsmanship.

#### COLLECTION

Examine the working conditions, collect used core parts and accessories on the used machine. Only machines with 100% operation, low working hours and full functions can be collected.

#### INSPECTION

Certified professional inspectors who have worked for more than 10 years conduct comprehensive analysis on the machine. Worn parts and defective are checked and compared to XCMG standard. Reconditioning plan is then checked.

#### RECONDITIONING AND REPAIRING

Refinish core parts to restore usability. Replace all worn parts with genuine XCMG core parts.

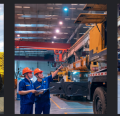

#### TESTING

Follow the test procedure, ensure the performance and reliability of the machine. The reconditioned products are returned to step 3.

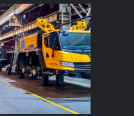

#### READY FOR DELIVERY

Ready for Delivery!

#### ISSUING REPORT

Certified customer reports, tests and verifies the reconditioned machine. SGS provides the third-party inspection certificate.

#### PAINTING

The whole machine is repainted to restore its appearance, bright as new.
